
Changing resolution on Windows

- Right-click anywhere on the desktop.
- Select 'Screen Resolution'.
- Select the screen you are trying to show on the projector.
 - If you are duplicating your screen, this will be display 1.
 - If you are extending your screen this will be display 2.
- Open the 'Screen Resolution' drop down list.
- Select the resolution 1280 x 720.
- Click 'OK' to close the box.
- Your computer should now show on the projector.

Changing resolution on macOS

- Select Apple menu.
- Select 'System Preferences'.
- Click 'Displays' and then click the next item saying 'Display'.
- Select 'Scaled'.
- Select the resolution 1280 x 720.
- Your computer should now show on the projector.
